

LIP FILLER SWELLING STAGES

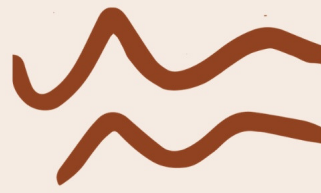

A guideline of what to expect after lip filler.
Individual results vary.

KEEP A BASELINE PICTURE

Keep a picture of how you looked before getting lip filler. We will refer to this pic when we want to assess whether or not your lip filler has resolved. A must have to avoid lip filler blindness syndrome.

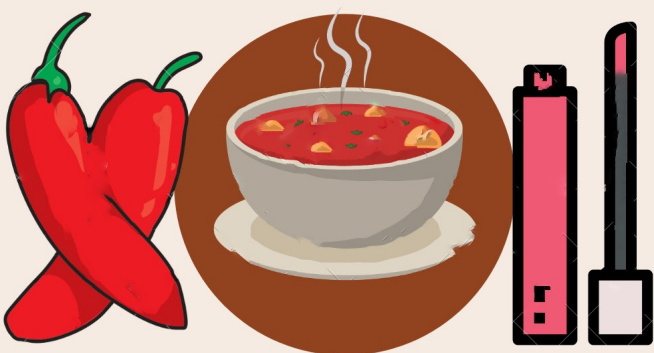

INJECTION DAY

2-3 DAYS OF SWELLING

Swelling is usually most apparent the night of injection and the next morning, stay calm it will go down. You can use ice as needed for swelling.

AVOID HOT FOOD, SPICY, FOOD & LIP PLUMPER

These can make your lips swell more.

DAY 4-5

Most of the swelling has resolved.
Lip obsession has begun.
